

110TL M9

THREE-PHASE PV INVERTER WITH NINE MPPTs

THE BEST SOLUTION FOR INDUSTRIAL SELF-CONSUMPTION SYSTEMS

A three-phase inverter family for industrial PV systems.

Maximum efficiency with nine independent MPPT inputs

It has 9 independent maximum power point trackers (MPPT), plus a DC/AC power conversion stage. This ensures that the energy of the PV module is optimized at all times, even in difficult situations of scattered clouds and partial shading. Moreover, the inverter offers great flexibility for configuring solar array, thanks to the nine independent inputs and a wide range of input voltages, as well as connecting different DC input powers to each MPP tracker (asymmetric configuration).

Plug & Play technology

The inverter connection is fast, simple and extremely easy to install. The country specific configuration and language can be easily selected from the inverter App or with a PC by connecting via a web browser to the server integrated in the inverter itself.

Rugged design

Specially designed for indoor and outdoor applications (IP66). INGECON® SUN 110TL M9 inverters have been designed to guarantee a long life expectancy and to withstand extreme temperatures.

Ease of maintenance

Internal datalogger for data storage.

Control either from a remote PC or on-site setting. Status and alarm LED indicators.

Software included

Included at no extra cost are the INGECON® SUN Monitor and its smartphone version iSun Monitor for monitoring and recording the inverter data over the internet. In addition, users can download the latest version of the firmware from the Ingeteam website www.ingeteam.com, and update it using a simple remote connection. Ethernet and Wi-Fi communications are supplied as standard.

Standard 5 year warranty, extendable for up to 10 years.
