

Voltage and current measurement for air or outdoor

Ingepac SR LPVT and Ingepac SR LPCT sensors offer an alternative solution to conventional instrument transformers in a reduced space and at a competitive cost, being a very complete solution for **medium voltage** environments.

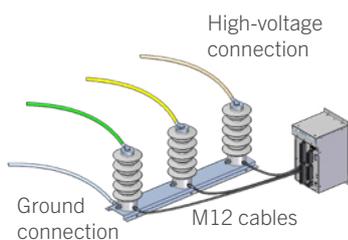

Ingepac SR sensors comply with the requirements defined in the **IEC 61869-10** and **IEC 61869-11** standards, thus guaranteeing a measurement accuracy of **0.2 S** for currents and **0.5 P** for voltages.

Ingepac SR sensors are subjected to the **same accuracy and surge tests** as conventional transformers, following **IEC 61869-1** and **IEC 61869-6** standards.

Applications

- Air and pole-mounted switchgear
- Reclosers
- Sectionalizers

Benefits

- Measurement and protection accuracy
- Small size and weight
- Good accuracy
- Very safe
- Extensive dynamic range
- Low cost
- Ease of installation
- More sustainable, with less amount of raw material needed
