### Karadeniz - Fatmagül Sultan Man Diesel & Turbo

Powership

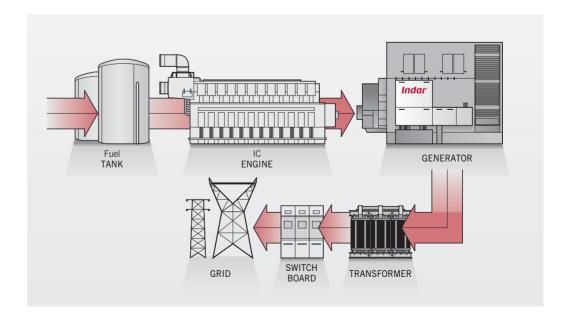

### **Applications:**

Diesel/Gas generators for Power Generation:

- Powerships
- · CHP Plants
- · Combined Cycle
- · Distributed Energy
- Biomass

Floating power plants are designed and constructed to fulfill the urgent electricity needs of countries. They are delivered to the client countries as a fully operational floating power plant, following a rental contract or a Power Purchase Agreement (PPA).

6x PSA1600 Synchronous Generators each coupled to engine MAN 18V51/60DF Output: 21,367 kVA | Voltage: 11,000 V | Speed: 500 rpm | IP: 23 | IC: 01
