

Distance protection

INGEPAC EF ZT is a distance protection relay with **5 independent zones of operation** on which **MHO or quadrilateral** characteristic can be set independently, suitable for transmission lines, or multibreaker configurations such as, breaker and a half or ring. It determines the type of fault, differentiating among **three-phase, two-phase and earth faults**.

INGEPAC EF ZT includes **backup units** for one or two breakers, **synchronism checking** functions or **automatic reclose** with different timings for single-pole or three-pole trips. It also provides **teleprotection** schemes or fault locator function that provides distance to the fault.

Applications

- Primary or secondary protection for cables, overhead or mixed lines in transmission and under-transmission grids (INGEPAC EF ZT0 model)
- Primary or secondary protection for breaker-and-a-half schemes (INGEPAC EF ZT1 model)
