

**CHARGING SOLUTIONS
FOR ELECTRIC VEHICLES**

Ingeteam

INNOVATION FOR OUR CUSTOMERS

INGETEAM is an international technology group specializing in **electrical energy conversion**.

Its technological developments in **power and control electronics** (inverters, frequency converters, controllers and protections), **Indar rotating electrical machines** (motors, generators and motor-pump sets), **systems** (integration of electro-mechanical and automation engineering) and operation and maintenance **services**, allows it to offer solutions for the following sectors:

wind, photovoltaic, hydroelectric and fossil generation, metal transformation industry, naval, railway traction, waters, electric vehicle charging, green hydrogen and electric power grids, including substations covering transport and distribution, always seeking more efficient energy generation and consumption.

FUSION

RAPID 60

RAPID 120/180

RAPID 420

The charging point in public and private settings

The **FUSION range** is available in two versions, **FUSION Street** for installation on the ground, and **FUSION Wall** for installation on the wall.

It is the range of dual units designed to meet all the requirements of electric vehicle charging in public and private settings.

It incorporates Ethernet and Wi-Fi communications as standard, as well as advanced latest generation functions such as Dynamic Load Management 2.0 (DLM 2.0) and OCPP protocols.

	FUSION Street/Wall	
	FS1MW / FW1MW	FS3MW / FW3MW
Grid	Single phase	Three phase
MID wattmeter	✓	✓
Manual Type A differential protection ⁽¹⁾	✓	✓
Overcurrent protection (Curve C)	✓	✓

Notes

⁽¹⁾ Optionally, the differentials can be Type A resettable or Type B.

FUSION FEATURES

Functions

- Ground and wall versions, suitable for outdoor use.
- Front door for easy operation and maintenance.
- Single-phase and three-phase versions with up to 32 amps per socket.
- Multiple sockets available, mode 1&2 sockets, mode 3 cables and sockets.
- MID wattmeters.
- Warning message in case of power outage.
- Possible customization using vinyls on the four sides⁽¹⁾.

HMI

- RGB status LEDs.
- RFID reader.
- 4.3" color screen, multi-language.

Communications and software

- Dual Ethernet port with Switch mode.

Notes:

⁽¹⁾ Large surface where vinyl can be applied.

⁽²⁾ 5 m optional.

- Wi-Fi.
- OCPP.
- DLM, static and dynamic power management with other Ingeteam DC and AC units.
- Web Manager.
- Modbus TCP, MQTT.
- Automatic software updates.
- Update via USB.

Safety

- Differential protections and circuit breakers.
- Main switch for quick disconnection of the charger.
- Security lock with key.
- Door-opening sensor.

Options

- GPRS - 2G/3G/4G communication.
- Contactless bank card reader.
- DC leak detector.
- Type A self-resetting differentials or Type B differentials.
- Smart DLM.
- Cloud Manager.

Notes

⁽¹⁾ For safety reasons, the equipment is factory limited to 32 A global (16 A per hose). This configuration can be modified through the Webmanager, following the process indicated in the corresponding Webmanager manual.

⁽²⁾ Optionally, the differentials can be resettable Type A or Type B.

⁽³⁾ Manual or resettable protection depending on the model.

RAPID 60

Fast charging solutions for all types of urban and inter-urban environments. Ideal for reduced spaces.

With increasingly efficient vehicles, and with the emergence of new mobility scenarios, at Ingeteam, we have reimagined fast charging. Ingeteam presents the new range of RAPID 60 kW chargers, capable of charging a single vehicle at 60 kW or two vehicles simultaneously at 30 kW. The **new RAPID 60** is a solid and robust charger, designed to resist the most demanding conditions thanks to its construction in galvanized steel and stainless steel. The result is a compact, silent, light and elegant unit, featuring a modern design with clean lines.

The lack of rear ventilation slots means it can be installed against the wall, or with back to back with another RAPID 60. The main design premise was to achieve a silent unit, so that it could be installed in enclosed or urban spaces. It also has a cable management system (CMS) to make it easier to use. This unit is technologically ahead of its time, featuring credit card readers, parking sensors and Plug & Charge technology, not forgetting the dynamic load management between the unit's outputs, between multiple DC and AC units, as well as dynamic balancing with the installation's remaining loads.

	RAPID 60

RAPID 60 IN DATA

Functions

- Highly resistant enclosure, either galvanized steel or stainless steel.
- No ventilation slots on the back, can be installed against the wall or two units back to back.
- Can be positioned with a crane and pallet truck.
- Cable management system (CMS).
- Simultaneous AC and DC charging:
 - DC: DC charging at 60 kW.
Dual charging at 30 kW.
 - AC: 22 kW.
- Integrated DC wattmeters.
- AC MID wattmeter.

HMI

- RGB status LEDs on supports and 360° ring.
- RFID reader.
- 10.1" color touchscreen, multi-language.

Communications and software

- Dual Ethernet port with Switch mode.
- RS485.

- OCPP, Autocharge, Plug & Charge.
- DLM, static and dynamic power management with other Ingeteam DC and AC units.
- Web Manager.
- Modbus TCP, MQTT.
- Automatic software updates.
- Update via USB.

Safety

- Built-in electrical protections.
- Security lock with key.
- Door-opening sensor.

Options

- GPRS - 2G/3G/4G communication.
- Ethernet switch kit for 8 ports.
- Contactless bank card reader.
- Emergency button.
- Connector locking system.
- Parked vehicle detector.
- Self-resetting differentials.
- Smart DLM.
- Cloud Manager.

RAPID 120/180

Ultra-fast charging points that allow up to three vehicles to be charged simultaneously

Being able to respond to current market needs is always a challenge, which requires constant transformation. In order to develop the new RAPID range, at Ingeteam, we asked ourselves countless new questions, as these new units had to cover not only current but also future needs in a constantly evolving sector.

Ingeteam presents the new range of **RAPID 120 kW and 180 kW chargers for ultra-fast charging**, to match the potential of the most demanding vehicles. They have been designed to meet the highest quality and performance standards in terms of power management, communications, reliability and efficiency.

They are compatible with the CCS and CHAdeMO standards. The Trio models also incorporate a 22 kW Type 2 socket for alternating current charging, allowing up to three vehicles to be charged simultaneously. Moreover, they feature power management between the different outputs on the unit, or between various units in one installation.

RAPID 120/180 FEATURES

Functions

- Highly resistant enclosure, either galvanized steel or stainless steel.
- Modular electronics. The 120 kW units can be expanded to 180 kW.
- Cable management system (CMS).
- Ambient light.
- Simultaneous AC and DC charging:
 - DC: DC charging at 180 kW.
Dual charging at 90 kW.
CHAdeMO up to 80 kW.
 - AC: 22 kW.
- Integrated DC wattmeters.
- AC MID wattmeters.

HMI

- RGB status LEDs.
- RFID reader.
- 7" color touchscreen, multi-language.

Communications and software

- Ethernet, RS485.
- OCPP, Autocharge, Plug & Charge.

- DLM, static and dynamic power management with other Ingeteam DC and AC units.
- Web Manager.
- Modbus TCP, MQTT.
- Automatic software updates.
- Update via USB.

Safety

- Built-in electrical protections.
- Security lock with key.
- Door-opening sensor.

Options

- GPRS - 2G/3G/4G communication.
- Ethernet switch kit for 8 ports.
- Contactless bank card reader.
- Emergency button.
- 21" Full HD advertising screen.
- Connector locking system.
- Parked vehicle detector.
- Smart DLM.
- Cloud Manager.

RAPID 420 FEATURES

Functions

- Excellent power density standalone charger.
- Highly resistant enclosure, either galvanized steel or stainless steel.
- Up to 4 cables in the same charger (up to 2 vehicles to be charged simultaneously).
- Flexibility to combine CCS, NACS & CHAdeMO connectors.
- Simultaneous DC charging:
 - Up to 2 vehicles at the same time.
 - Possibility of granular split of power with increments of 60 kW.
- Integrated DC wattmeters.
- Configurable power versions: 420 kW, 360 kW, 300 kW & 240 kW.
- Configuration focused on the ease of use for the installer.

Communications and software

- DLM, static and dynamic power management with other Ingeteam DC and AC units.
- Web Manager.
- Modbus TCP, MQTT.
- Automatic software updates.
- Update via USB, Web Manager & OCPP.
- 31,5" Full HD advertising screen.

Safety

- Built-in electrical protections.
- Security lock with key.
- Door-opening sensor.

Options

- C-Fly System (Cable Fly System) useable length 5,4 m front, 4,7 m side.
- GPRS - 4G communication.
- Ethernet switch kit for 8 ports.
- Contactless bank card reader.
- Emergency button.
- Parked vehicle detector.
- Smart DLM.
- Cloud Manager.

DLM 2.0

Maximum use of the available power

Dynamic Load Management 2.0 (DLM 2.0) is the latest generation of the dynamic load management system incorporated as standard in all FUSION and RAPID models.

DLM 2.0 allows all sockets on each charging point to share the total power defined on the equipment in the most balanced and dynamic way possible, also allowing a set of units to be interconnected, defining a maximum power for them all so that they never exceed the assigned threshold, regardless of the number of vehicles charging simultaneously.

This means we can **optimize the use of the existing installation**, either due to contracted power or any other limitation of the installation.

GENERAL OPERATION

DLM 2.0 dynamically manages the load of each socket in the installation, depending on the number of vehicles that are charging, the types of socket or connector used and the actual current required by each vehicle, evaluating all of this in real time.

It is dynamic and versatile, as if one of the vehicles does not use all of the assigned current, that unconsumed current is redistributed to the other vehicles that are connected for better use of the available power.

It is possible to combine alternating and direct current points in the same group of charging points.

DLM 2.0 FEATURES

- Multiple units interconnected, in series or in a hub.
- Maximum power of the fixed charging installation.
- Instantaneous charging powers adjusted according to the number of vehicles charging and their consumption.

SMART DLM 2.0

Smart power

Smart DLM is the latest evolution of the DLM 2.0 system for smart and dynamic management of the power in an installation that, in addition to chargers, is made up of other loads, such as those of an office or industry.

It consists of a grid analyzer, installed at the point to be managed and connected to a unit. All FUSION and RAPID models are compatible with Smart DLM and they can even be combined.

Smart DLM **allows the overall power of the chargers to be modified in real time and dynamically**, which will regulate their power as a whole, adapting to the other consumers in the installation.

This means that we can manage the power demand and avoid or minimize the need to increase the contracted power.

The Smart DLM system analyzes the power consumed by the entire installation at all times, including charging points.

SMART DLM 2.0 FEATURES

- Multiple units interconnected, in series or in a hub.
- Maximum power to be absorbed by the fixed grid.
- Instantaneous powers adjusted according to the vehicles charging and the total consumption of the installation.

*There are two versions according to the maximum power, Smart DLM and Smart DLM Pro (>45 kW).
