

**THREE-PHASE
TRANSFORMERLESS
BATTERY INVERTER**

**Battery inverter up to 1.42 MVA
with 1500 V technology**

The INGECON® SUN STORAGE Power is a three-phase bidirectional battery inverter that can be used in grid-connected and stand-alone systems. This battery inverter offers a high-power density in a single power block, providing different configurable operating modes. Besides, it features the same technology as Ingeteam's PV inverters, facilitating the supply of spare parts.

Easy maintenance

String inverter philosophy has been applied in the design of this central inverter, facilitating the inverter usage. Moreover, the input and output lines are integrated into the same cabinet, in order to make maintenance work easier.

Battery management

The INGECON® SUN STORAGE Power features a highly advanced battery control technology, ensuring the maximum life of the storage system. The battery temperature could be controlled at all times ensuring an enhanced lifespan of the accumulator. This battery inverter is 100% compatible with Ingeteam's PV inverters.

Software included

Included at no extra cost the software INGECON® SUN Manager for monitoring and recording the inverter data over the Internet. Ethernet communications are supplied as standard.

The INGECON® SUN STORAGE Power three-phase battery inverter complies with the most demanding international standards.
