C Series 1,500 Vdc****UP TO 3.93 MVA AT 1,500 V****THREE-PHASE TRANSFORMERLESS STORAGE INVERTER WITH AN EXTRA THERMAL STABILITY AND A GREATER POWER DENSITY**

The INGECON® SUN STORAGE 3Power U HV C Series is a three-phase bidirectional storage inverter that can be used in grid-connected and stand-alone systems. This one-of-a-kind battery inverter achieves a market-leading power density of 499 kW/m³, as it provides up to 3,928 kVA in just one power stack.

Latest generation electronics

The INGECON® SUN STORAGE 3Power U HV C Series storage inverter features an innovative control unit that performs a more efficient and sophisticated inverter control, as it uses a last-generation digital signal processor.

Liquid Cooling System (LCS)

Ingeteam has already supplied +54 GW of liquid-cooled wind power converters worldwide. It offers a greater thermal stability and a more optimized component usage. The LCS has been designed to refrigerate the IGBTs, the power phases and the IP65 compartment. It features less moving components, so it consumes a lower amount of power and it requires less maintenance works.

The LCS is a closed circuit supplied totally filled and purged, equipped with fast connectors with an anti-dripping system, so it offers zero risk of particle entrance. It has been designed to avoid siphons in order to easily purge it if necessary. The coolant used is a biodegradable glycol water mixture. There is no need of emptying the LCS in order to replace the phases, nor the sensors.

NEMA 3 protection

A secondary liquid cooling system is used to refrigerate the air inside the NEMA 3-protected compartment. A water-air heat exchanger is used for that. This compartment contains the power and control electronics, the DC fuses, the DC and AC protections, the busbars and the power phases.
